# Listerdale Sans

Five weights, roman and italic, accessible by design

A geometric sans serif in five weights, roman and italic, in two optical cuts, drawn for effortless recognition: commonly confused characters take clearly different shapes, spacing runs a little wider than usual, and stroke weight settles gently toward the baseline. The result is a typeface that reads designed for comfortable, low-ambiguity reading, with features that may particularly benefit readers with dyslexia and low vision.

# Designed for reading

Some fonts add avoidable visual ambiguity to reading. This family distinguishes commonly confused characters, keeps punctuation visible, raises the lowercase slightly, and gives every word a little more room to breathe.

1lI

One, tailed l and a crossbarred capital I -  
three shapes no reader can confuse.

quip

The q carries a tail on its descender,  
so p and q are no longer mirror twins.

WOW

An open, uncrossed w -  
one less unfamiliar shape to decode.

0123456789

Cap-high lining figures, tabular widths on request (tnum);  
the zero carries a centre dot, so it never reads as O.

bd.

A narrower d adds a cue beyond direction alone; full  
stops and commas are enlarged so punctuation stays visible.

grounded

Stroke weight settles gently toward the baseline,  
anchoring each letter without drawing attention.

Spacing is set against unmodified Raleway as the baseline: sidebearings gain 12 units each (2.4% of an em in total); the word space (255 to 325 units) is 27% wider.

Both figures are measurable from the two font files. The r carries extra right clearance after r and c - 135 units of air - so rn never fuses into m, nor cl into d.

# Clear letters carry clear thinking

Set generously, read comfortably, forget the typeface entirely

A typeface succeeds when nobody notices it. Words should arrive as meaning, not as rows of shapes to be decoded. Every decision in this family - the distinct forms, the widened spacing, the quiet weight at the baseline - serves that single purpose: letters that stay out of the way of what they say.

## Character set

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

! ? & @ ( ) [ ] , . : ; ' " " -- % \* + = / #

## Recommended settings

Body text 11pt or larger with 1.5 line spacing, left-aligned and unjustified.  
Avoid all-caps for running text. Light is at its best at large sizes;  
Two optical cuts share identical letterforms and widths: Display for headings and sizes above 20pt, the text cut for everything you read.
